WELDING ROTATORS HGZ-Series

The self-adjusting welding rotators from the HGZ series are designed for heavy duty rotating and positioning works. These machines create an added value to your processing and move your manufacturing to a top level.

Characteristics:

- Self adjusting to different diameters of the working piece.
- Top-class electronic components from Schneider/ Siemens/ Delta.
- Stepless adjustable speed of the driven part.
- Steel wheels which enclose locked solid rubber tyres.
- Excellent pressure distribution due to the 4 wheels per tool which leads to less distortion of the work piece especially when the wall of the item is thin.
- The strong and durable construction creates a very high stability.
- CE marking.
- The favourable price-performance ratio yields to a quick payback of your investment.
- The standard configuration includes a remote control which is equipped with a digital readout.

Available on request:

- Foot pedal for start-stop.
- Foot pedal for adjustable speed.
- Radio remote control.
- Mechanical adjustment for railways.

HGZ rotators can be supplied with a capacity from 5.000 Kg up to 500 Tons.

We also provide tailor-made D-HGZ welding rotators according to your special requirements.
